## ROBUSTNESS

"Today's investment, tomorrow's saving"

Generously sized and properly ribbed structural parts, strong milling heads, machines in perfect geometry... have always been the distinctive features of **NICOLÁS CORREA** since its foundation in 1947.

We are convinced Robustness is a good bet for our customers, a sensible investment that will result in the following benefits/values:

### RELIABILITY

In **NICOLÁS CORREA**, we extend the concept of robustness to the whole production process of the machine, always choosing technical solutions of the highest quality. For this reason, we offer as standard 5 year warranty on our milling machines.

### PRECISION

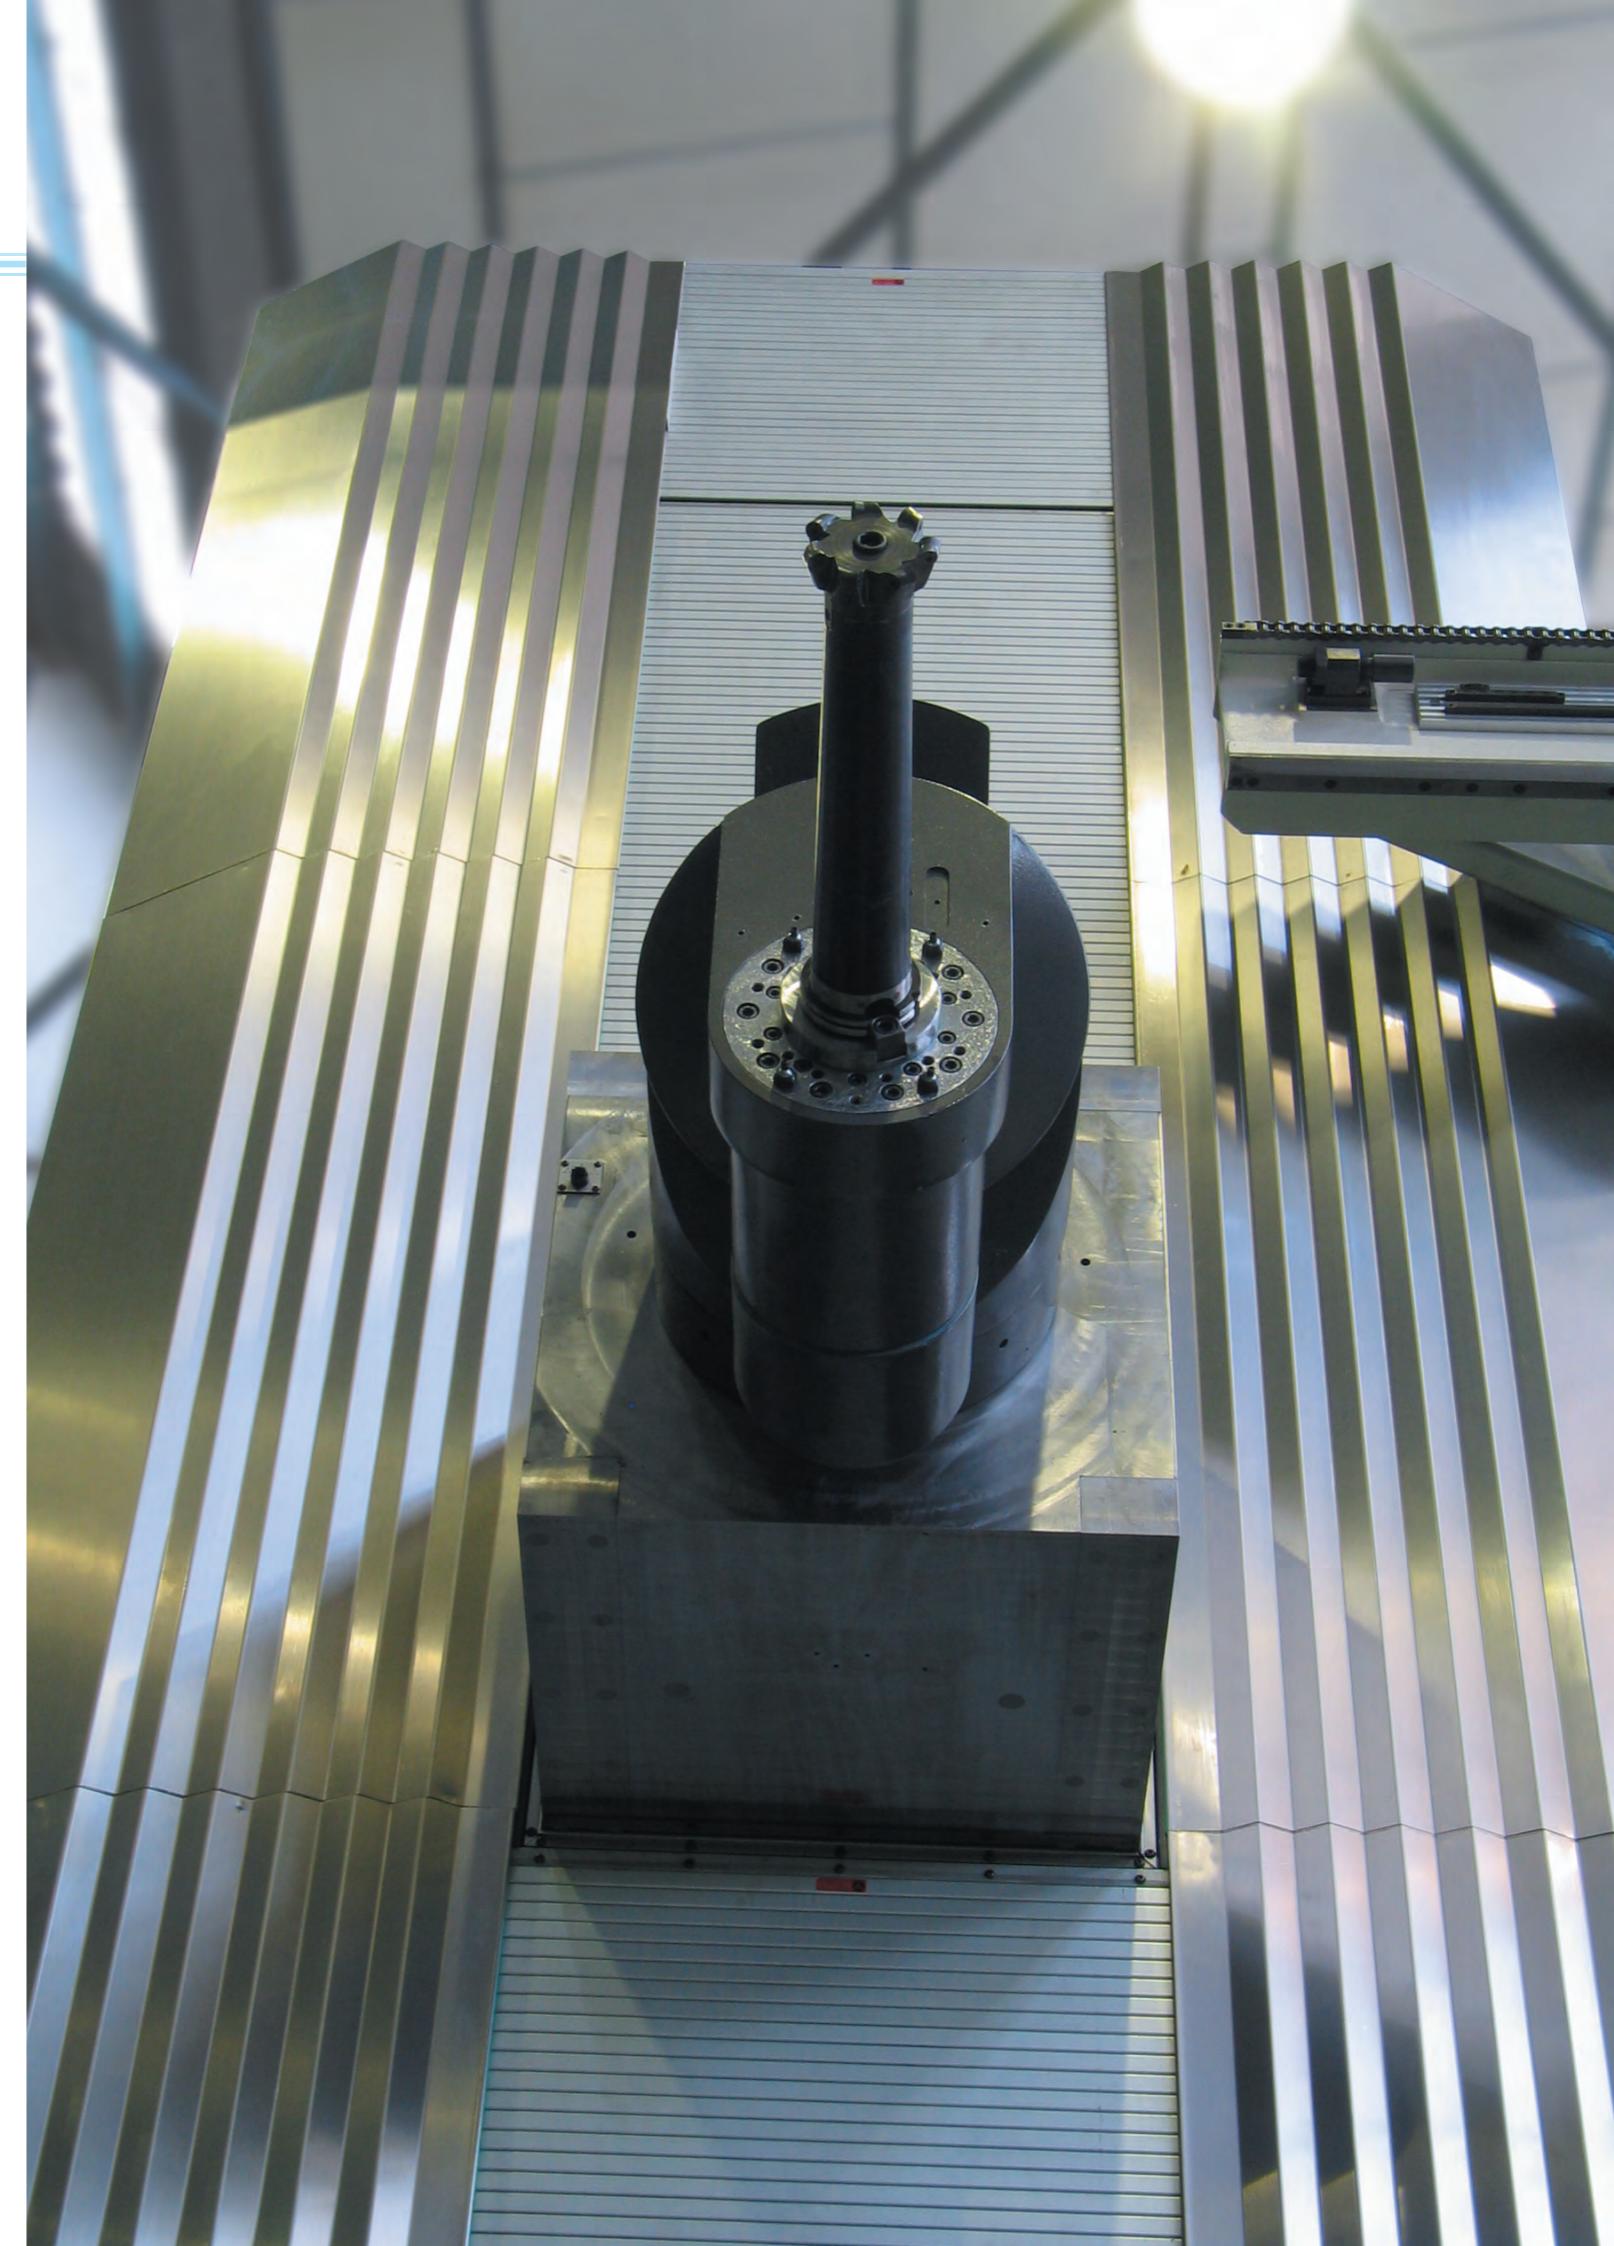

The milling machine is stable and maintains geometry values longer.

### DURABILITY

Our machines are designed and assembled to last for decades. Tireless workers that maintain their chip removal capacity in good condition for years.

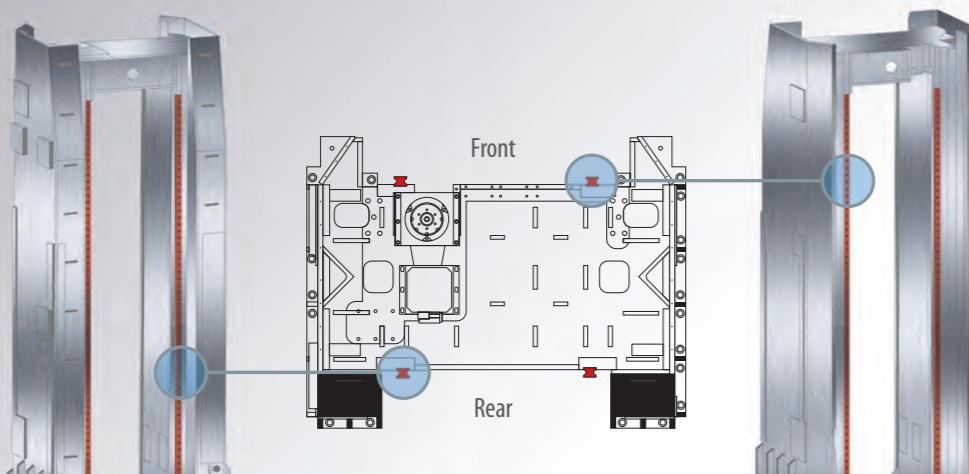

### MILLING HEADS

Unique robust milling head technology with superb repeatability, flexible to perform roughing and finishing operations.

## What makes the difference in the MAGNA?

The **MAGNA** represents the pure *box-in-box* concept, also incorporating two mechanical systems dynamically compensating for both ram droop and frame tipping. The result: tremendous chip removal capacity, maintaining very high levels of precision throughout the machine's volume

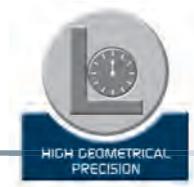

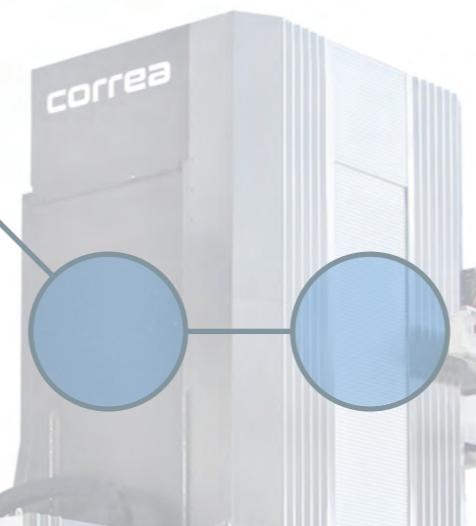

Rear part of the column

Front part of the column

BOX IN BOX

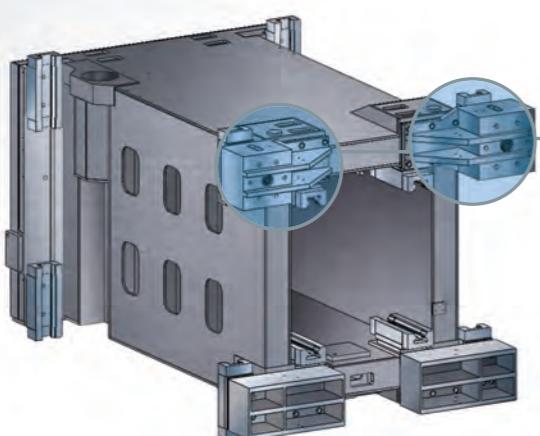

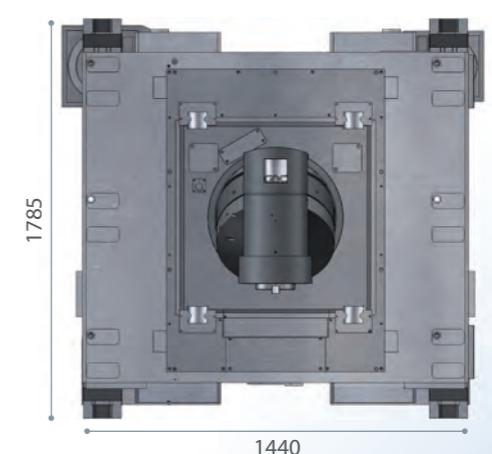

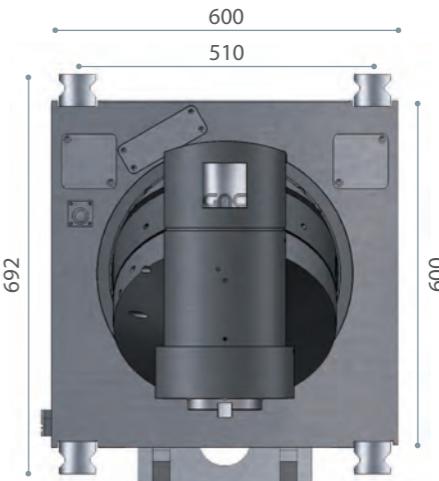

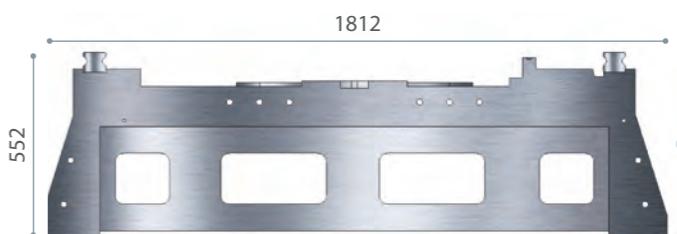

HIGH GEOMETRICAL PRECISION

OVERSIZED STRUCTURAL ELEMENTS

- Great cross sections
- Great roughing capacity
- Geometric stability in time

- Dynamic ram droop correction system
- Dynamic frame tipping compensation system

DYNAMIC COMPENSATION SYSTEM

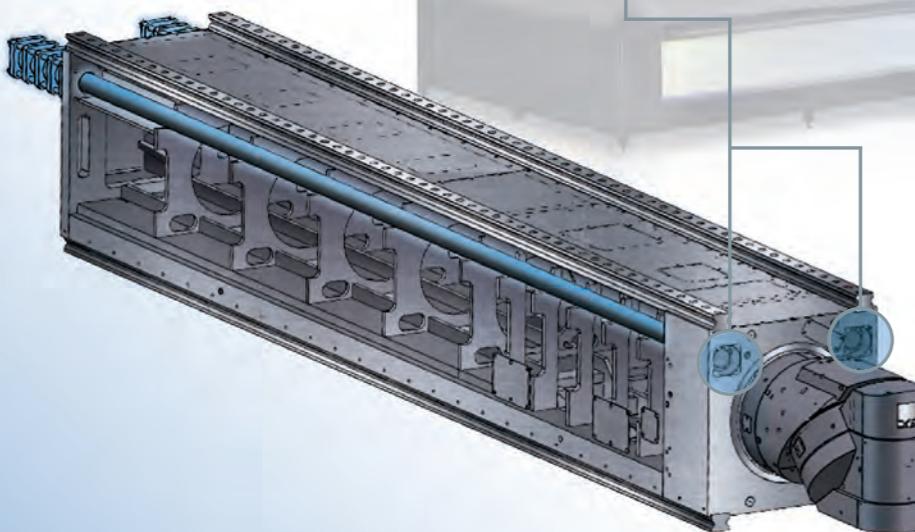

Stand-by function and Auto Switch off function, saving 20% of the total energy machine consumption

ECO-DESIGN

30 m/min in X, Y and Z axes, thanks to its V-Shaped linear guide-ways in all axes

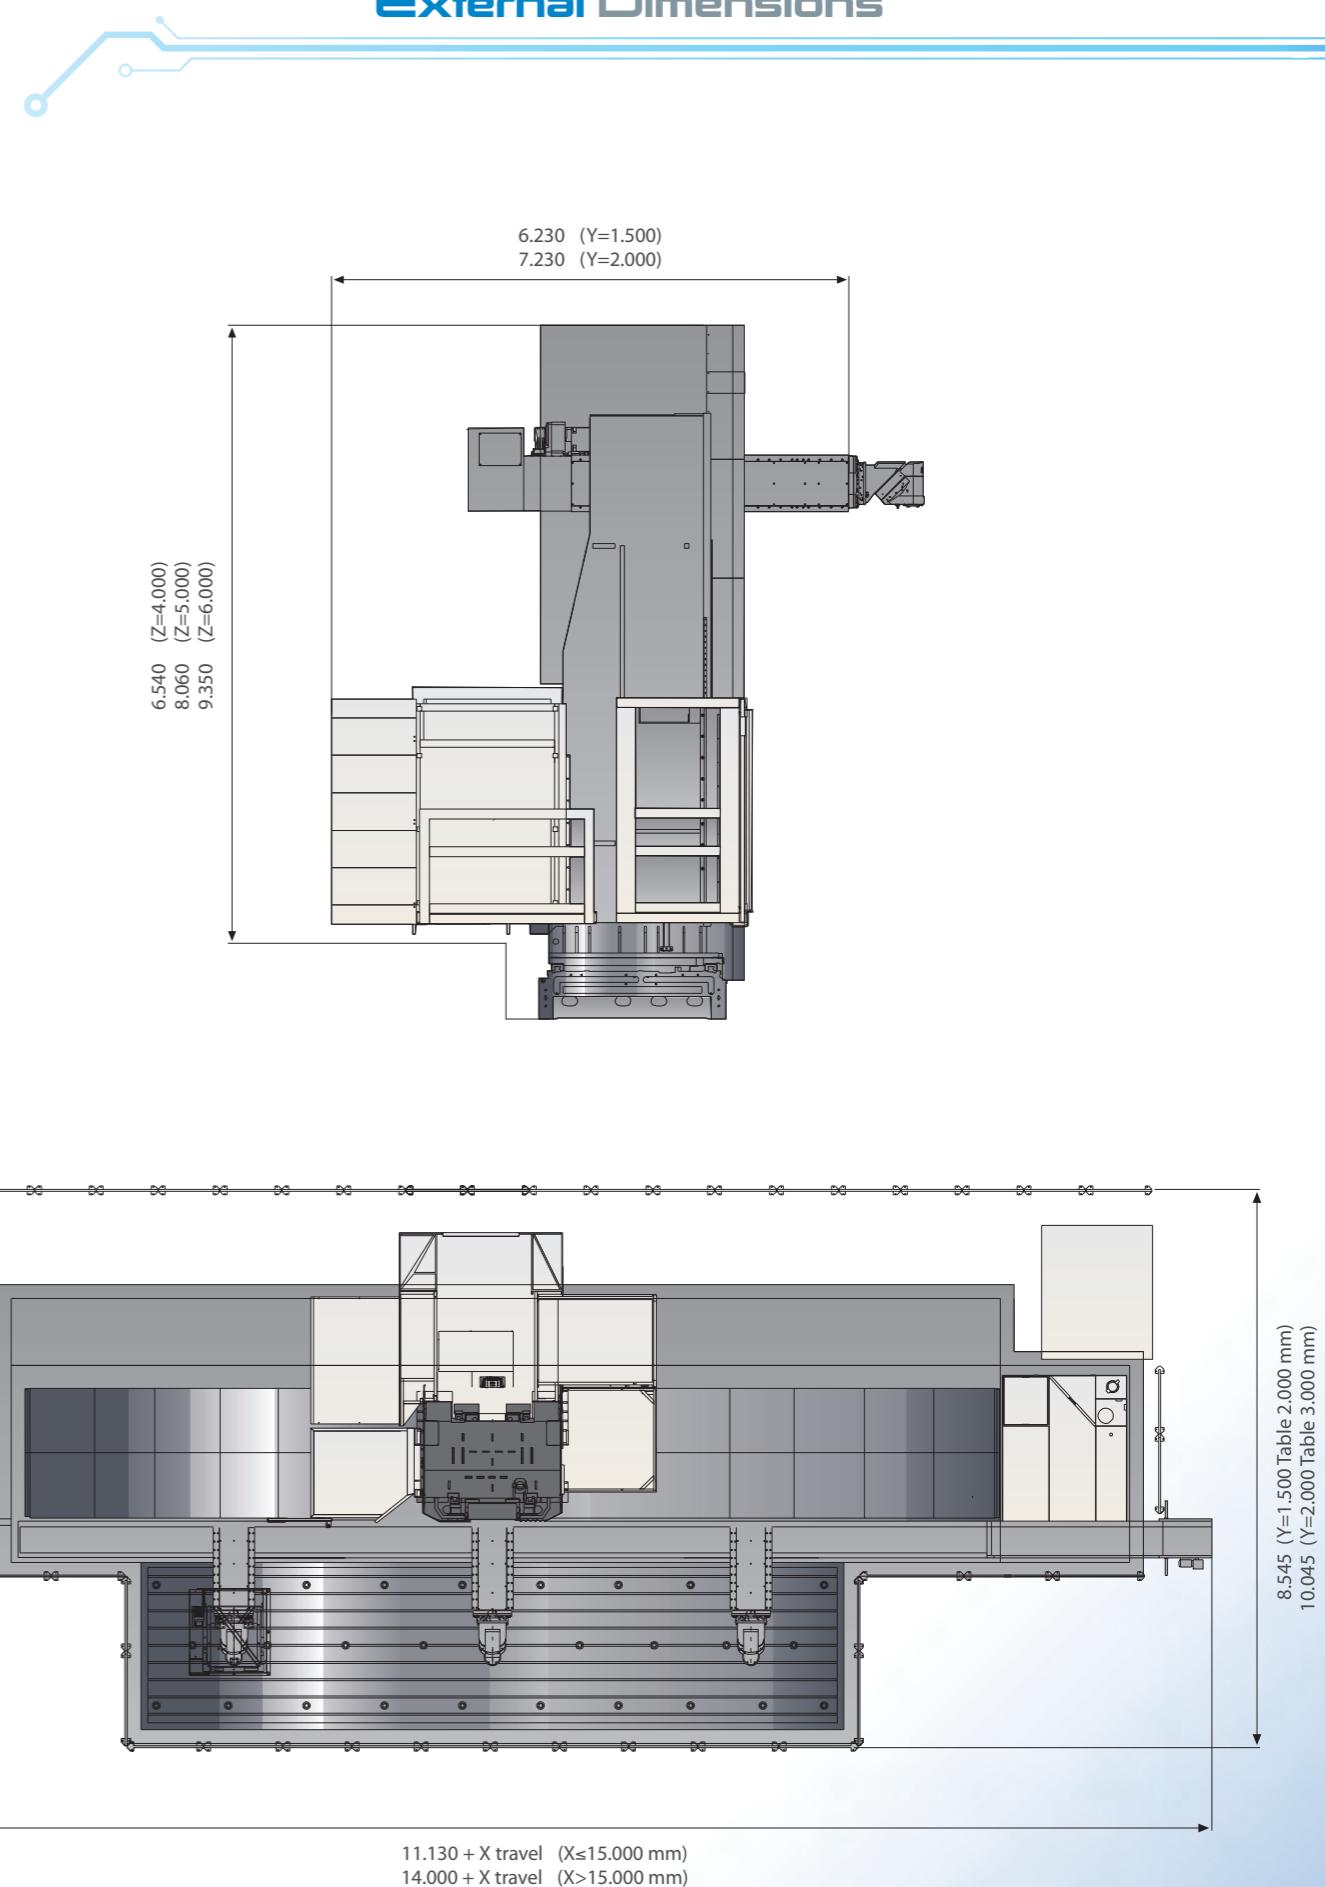

## Technical Features

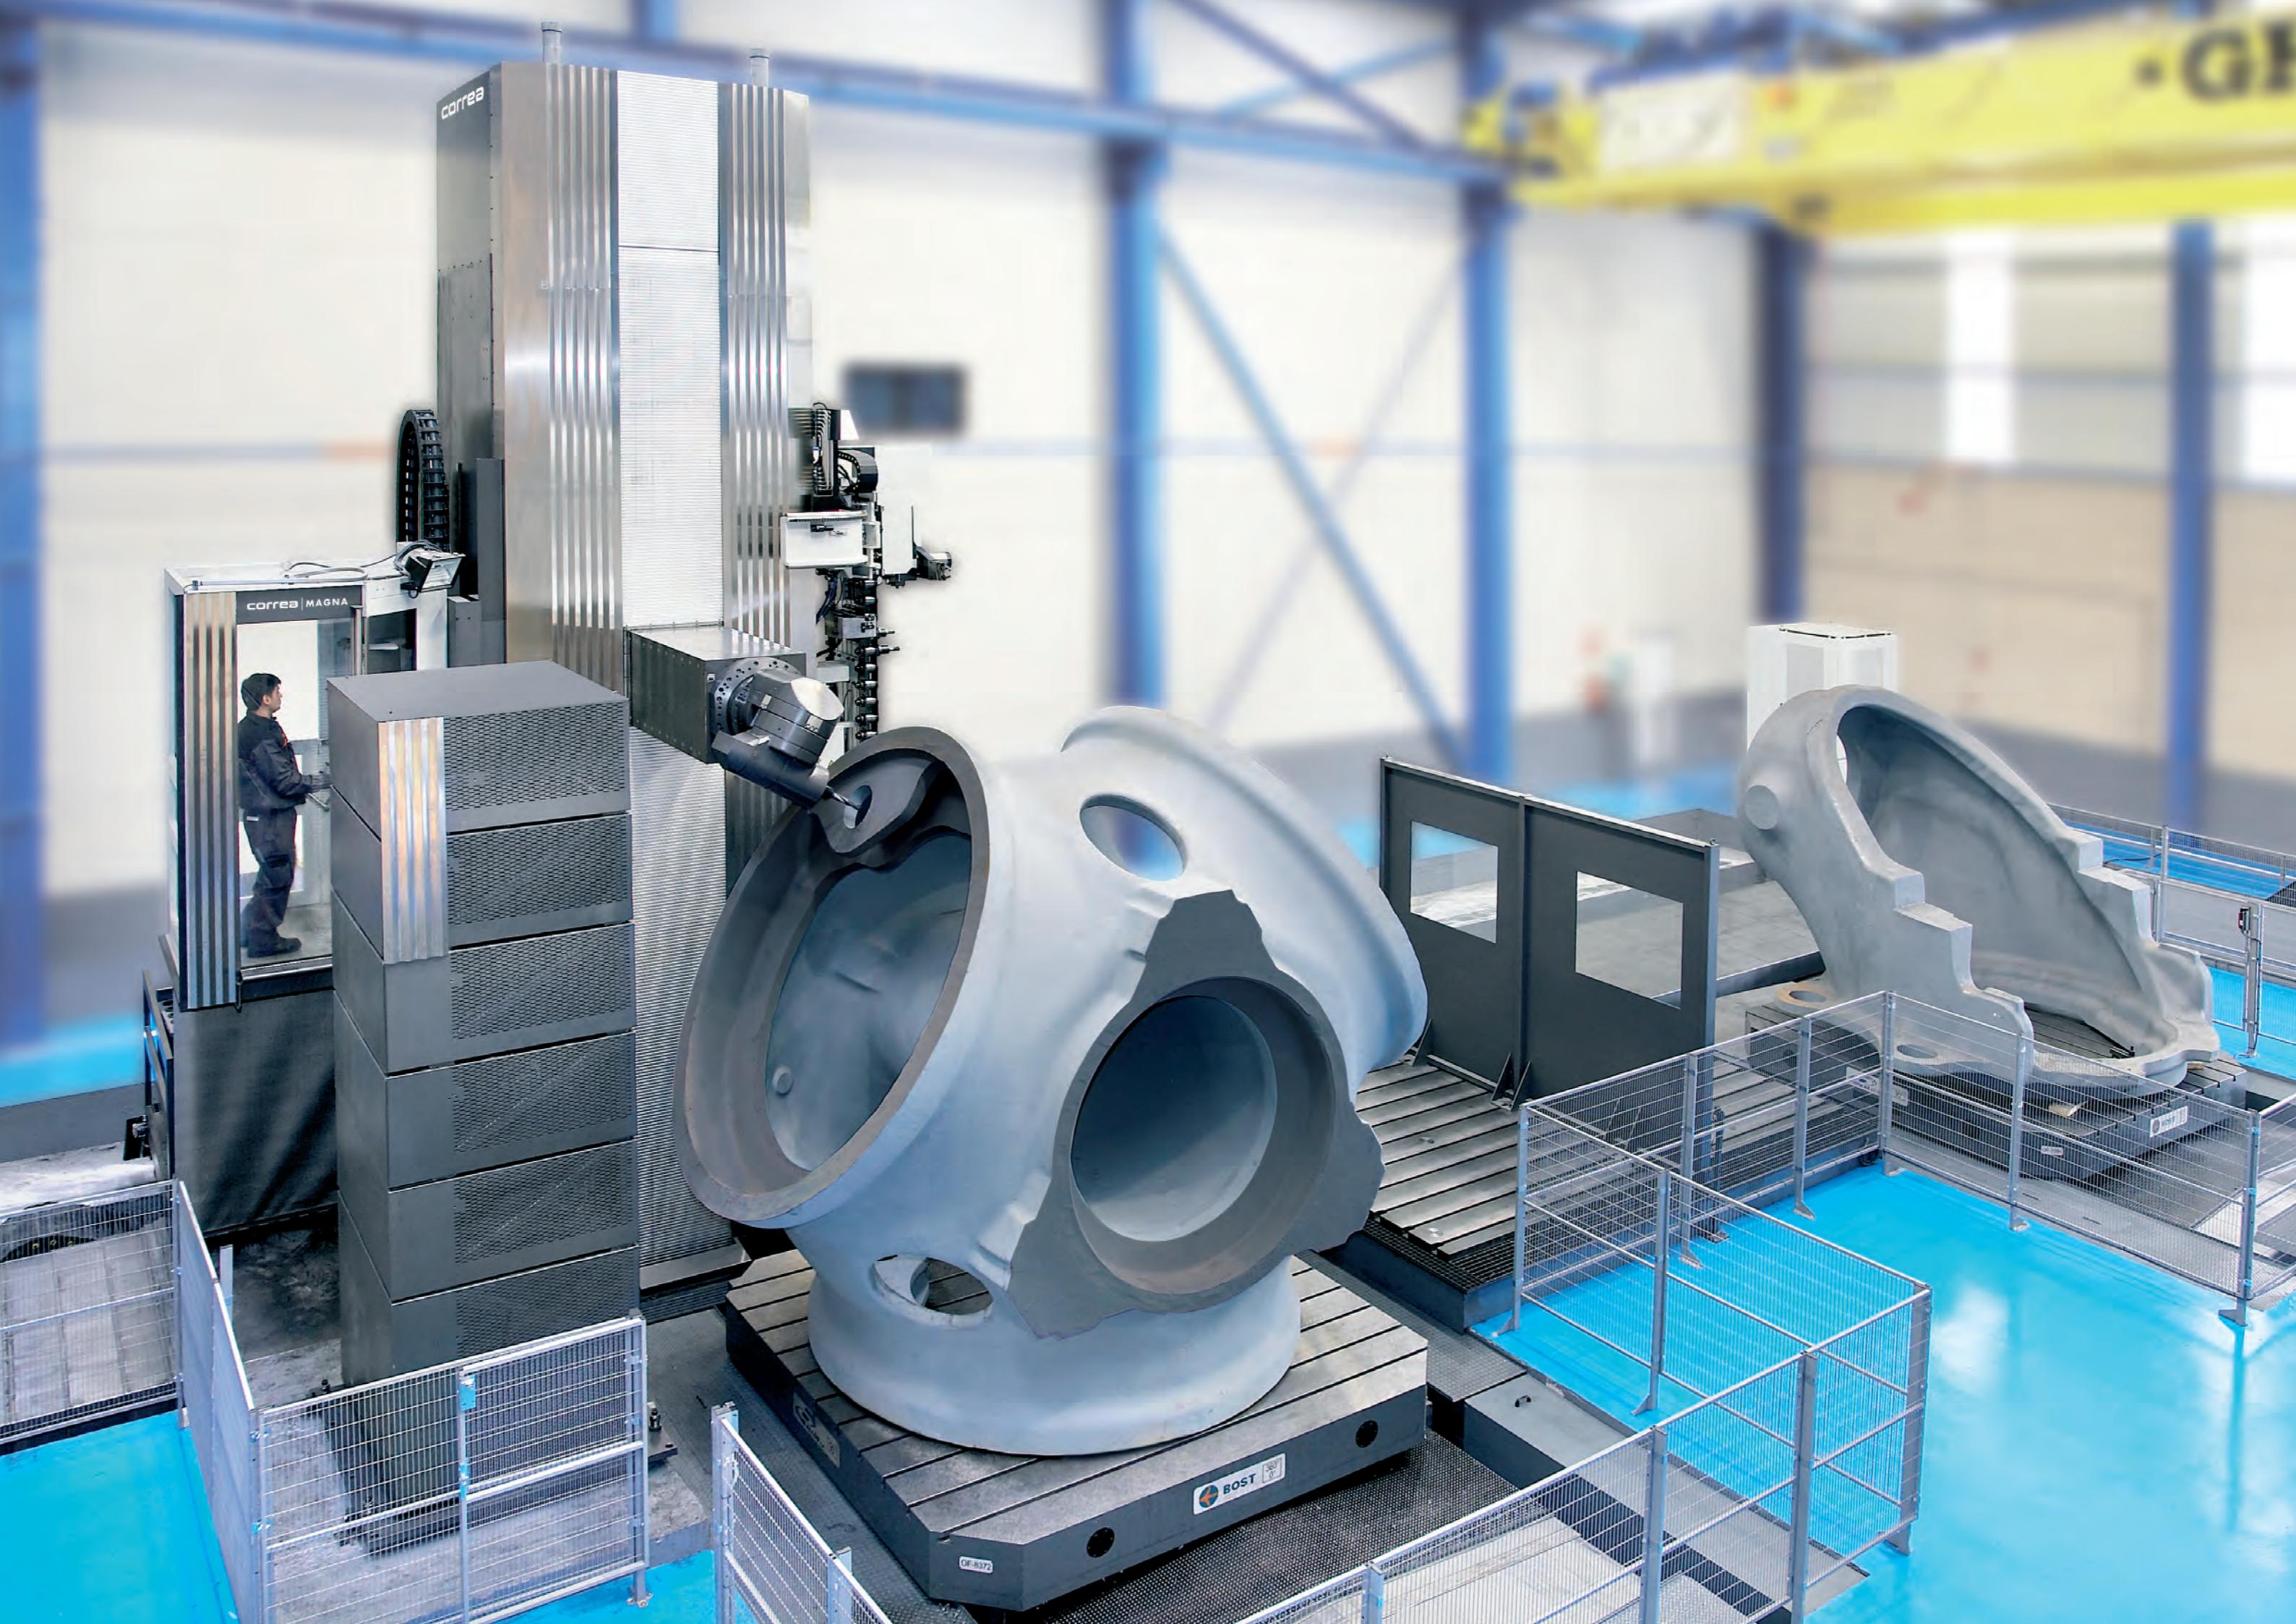

MAGNA					
TABLE					
Surface	mm	3.500 - 25.000 x 2.000, 2.500, 3.000 x 300			
Maximum load on the table	Tn/m <sup>2</sup>	10 / 15			
TRaverses					
Longitudinal	X mm	6.000 - 27.000			
Cross	Y mm	1.500 - 2.000			
Vertical	Z mm	4.000	5.000	6.000	7.000
FEEDS					
Maximum	X m/min	30			
	Y m/min	30			
	Z m/min	25	20	20	20
VERTICAL SPINDLE SPECIFICATIONS					
Spindle nose		ISO-50   HSK-100			
Programmable speed	rpm	4.000 / 6.000			
Maximum power	kW	52			
Maximum torque	Nm	1.375			

## Standard Equipment

- Automatic Universal Head UGA (2,5° - 2,5°)
- Hydraulic and cooling group
- Numerical control Heidenhain i530 HSCI or Siemens 840D sl (Operate HMI)
- Linear scales in all axes
- Portable handwheel
- External Coolant with adjustable nozzles in the head
- Air-conditioned electrical cabinet
- Internal and external air flow
- Linear guides in the X, Y and Z axes
- Guarding
- Lamp in the working area
- Tele-service

## External Dimensions

## Unique Indexing Milling Head Technology

Patented worldwide

### FLEXIBILITY

Rotation/indexation every **0,02°**  
thanks to the double Hirth  
coupling patented worldwide

**6.000 rpm** with no limitations

Adjustable coolant  
through spindle  
**17 - 70 bar**

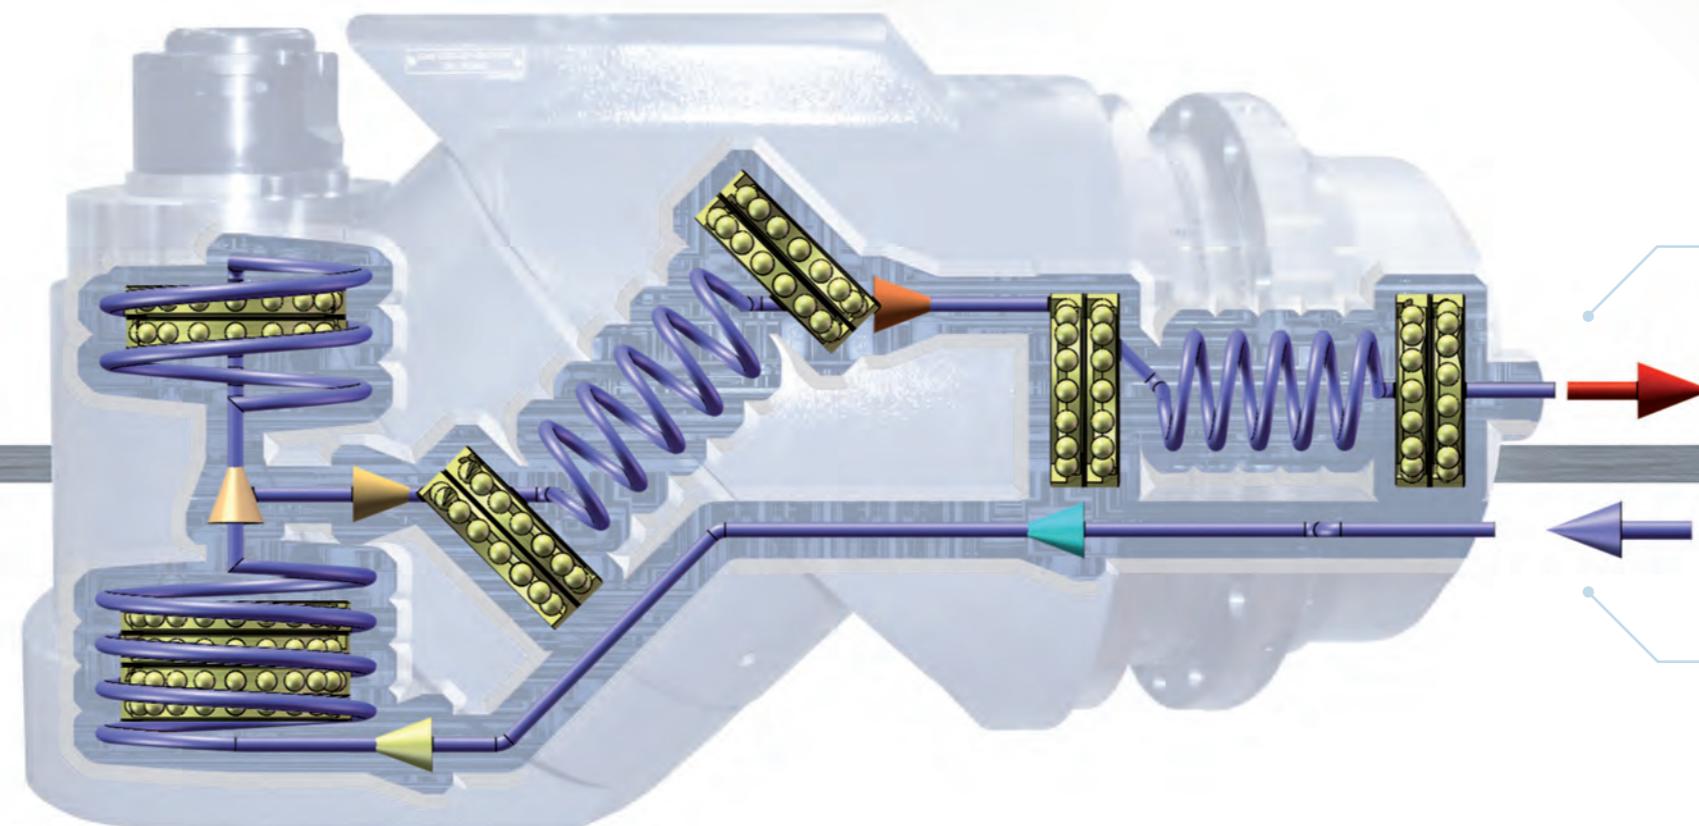

**100% ROBUST**

### RELIABILITY

Design and fabrication entirely  
by NCSA. The whole assembly  
process is monitored by NCSA

Head assembly in a **cleanroom**  
with constant temperature 22°C

Milling head run in the **test bench**  
**for 60 hours** performing body &  
spindle rotations

### ROBUSTNESS

**4+2 Bearings** in the main spindle

Tool clamping force = **2.500 kg**

Hirth coupling's locking force = **22.000 kg**

The milling head's design allows  
**52 kW – 1.375 Nm** in S1

Milling head body made of  
**casted steel GGG-50**

**100% RELIABLE**

### PRECISION

Maximum coupling  
repeatability error  $\pm 3''$

The bearing's cages of the  
main spindle & the external  
spacers of the secondary  
axes' bearings, **are cooled  
with water**

## Milling Head Changer

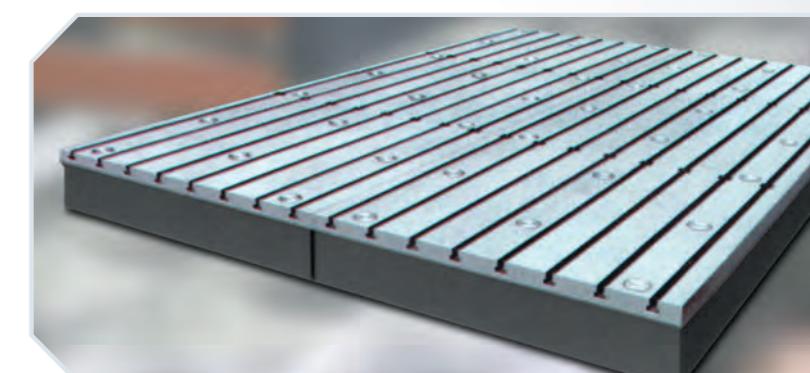

## Optional Equipment

Other heads

Automatic head-changer

Probes of measurement,  
tools and parts

Automatic charger for  
30, 40, 60, 120 tools

Pick up station for 6, 8, 12 tools

Air/Coolant cleaning gun

Self cleaning filter

Floor plates

Rotary tables

Turning tables

Chip conveyors

Perimeter fence

Different enclosures according  
to user's needs (only in some models)

Coolant through spindle

## Applications

## Applications

EQUIPMENT MACHINING (CRANES)

EQUIPMENT MACHINING (CRANES)

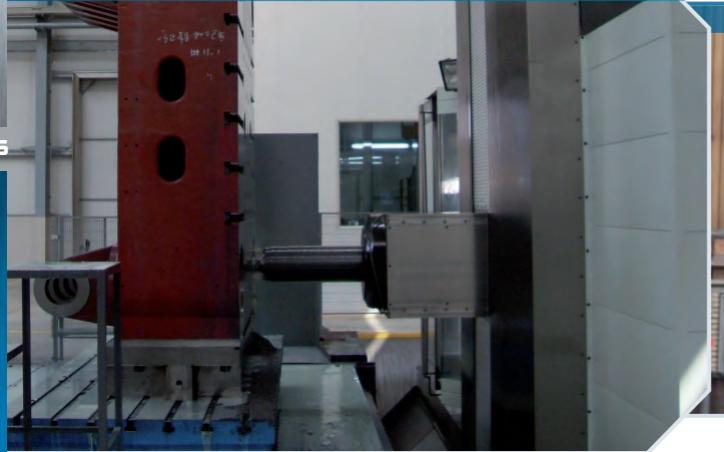

AUTOMOTIVE (INJECTION MOULD)

HEAT EXCHANGER MACHINING

## NICOLÁS CORREA, S.A.

Founded in 1947 and dedicated to the design and fabrication of medium and large size milling machines, is the headquarters of the Group **NICOLÁS CORREA** also formed by 4 other industrial affiliates:

### GNC HYPATIA

Design and fabrication of **CORREA** milling machines of small size, as well as accessories for the tool machine industry such as ATCs and milling heads.

### GNC KUNMING

Fabrication and distribution of milling machines for the local chinese market.

### GNC ELECTRÓNICA

Design and fabrication of electrical assemblies.

### GNC CALDERERÍA

Welded structures, sheet parts, and machine guarding systems.

Some critical components are supplied inside the group to assure quality and fulfill the flexibility requirements of our customers.

In 2006 **NICOLÁS CORREA** and **INDUSTRIAS ANAYAK** merged, what gave us the chance to offer one of the widest milling machine ranges on the market including: bed type (Also T-Configuration), Travelling column (Also T-Configuration), Portal milling machines. The design and manufacture are entirely made in Europe.

It quotes in the Madrid Stock Exchange since 1989.

In order to guarantee service and personal assistance to our customers, we have a wide sales and service network all over the world, being present through subsidiaries or agents in most of the countries.
